

IN-18 BIG Nixie Clock assembling tubes board v.01

Please note

- Power supply with less than 300mA output is not recommended.
- 12V DC, REGULATED power supply is the best choice.
- IN-3 neon bulbs are not soldered on the board shown below.
- 2 and 4 pins plugs should be inserted from the back side.
- Tube pins should be put on the tube before soldering, when all pins have been soldered tubes can be carefully removed from the board pins
